MPG was founded on basis of experienced engineers whose experience in UPS field is over decade to be able to support the best pre-sales and after-sales support to our valued customers.

Why do hospitals have uninterruptible power supplies?

Many hospitals have uninterruptible power supplies dedicated to specific testing bays to ensure a smooth and constant supply of utility power. Navigate outages safely and effectively during emergency situations.

Why do medical facilities need a power supply?

In medical facilities and hospitals, there are many devices and equipment used to treat patients and protect their lives. In order for these to operate stably, it is extremely important to secure a power supply. Stopping equipment due to unexpected power outages or other power problems puts patients at risk, so this must be avoided.

What is a Cyberpower medical grade UPS system?

CyberPower Medical Grade UPS systems have been designed to power and protect sensitive equipment in hospitals and healthcare facilities. Each medical UPS is UL 60601-1 tested to provide standby power in patient-care settings and comes with hospital-grade plugs and hospital-grade outlets, and a built-in isolation transformer.
