

Victoria distributed solar energy storage cabinet system prices

Are solar panels a good investment in Victorian homes?

Significant savings: Victorian homeowners can reduce energy bills by up to \$2,200 per year with solar panel systems, with payback periods as short as 3-5 years.

How much does a solar PV system cost in Australia?

These prices include the STC discount (Renewable Energy Target incentive) and GST, representing the total retail cost to the customer. A commonly sized 6kW Solar PV System would cost between \$4,000 and \$6,000 in most states in Australia, while a 10kW system typically falls between \$7,500 and \$10,500.

What is solar Victoria & how does it work?

Solar Victoria is the body the state government has set up to manage the delivery of the Victorian Government's Solar Home Program - which offers an additional rebate to the federal program to eligible solar panels Melbourne customers. Importantly this is in addition to the federal STC rebate mentioned above - you don't have to choose between them.

What solar rebates are available in Victoria?

Solar Rebates and incentives: Eligible homeowners can access up to \$1,400 in state rebates through the Solar Victoria program, plus additional federal incentives that can cover around 30% of upfront costs.
