

Everything about: studies, research, partnerships, services.

A study 1 carried out by the University of Applied Sciences Technikum Wien, AEE INTEC, BEST and ENFOS presents the market development of energy storage technologies in Austria for the first time.

A second call for subsidy applications for solar and storage in Austria - held from June 23 and July 7 and with a budget of EUR12 million - attracted so many responses the funding pot has ...

Summary: Vienna is emerging as a leader in photovoltaic energy storage projects, combining solar power with advanced battery systems to build a resilient and eco-friendly energy grid.

Austria's energy storage power stations exemplify innovation meeting practicality. From hybrid tech to policy-driven scalability, these systems offer actionable blueprints for global markets.

On Schafflerhofstraße in Vienna's 22nd district, on the site of a former municipal gravel depot, the energy provider is building a solar array that is equivalent in size to 15 football pitches.

As Vienna accelerates its renewable energy transition, energy storage projects have become critical infrastructure. This article explores the latest bidding strategies, technical requirements, and market ...

Austria's latest subsidy round for solar and storage has sparked overwhelming interest, highlighting how quickly demand for clean energy technologies is accelerating across Europe.

Made-in-Europe Bonus: Austria as one of the first EU countries to introduce a Europe-bonus for the installation of solar power systems as part of a subsidy program

Together with our partner SPI Intelligence Services, we have realized a large-scale rooftop installation at Wien Energie's power plant in Vienna Simmering. Close to 350 HeliaSol solar films have been ...
