

With the rapid growth of renewable energy in recent years, industry experts are urging Vietnam to increase the use of battery energy storage systems (BESS) within its national power grid.

The Vietnamese government has approved two new solar power plants and two battery energy storage systems (BESS) in the Nam Dinh and Thai Binh provinces. These projects are set to ...

To scale energy storage initiatives and ensure long-term commitment, Vietnam integrated the BESS pilot project into its national energy transition framework by aligning it with the ...

Vietnam is one of the first three countries selected for a pilot program under a new partnership initiative between the Asian Development Bank (ADB) and the Global Energy Alliance for ...

Vietnam's energy sector is undergoing a rapid and remarkable transformation. Just a short time ago, the country's national power plan, the Power Development Plan VIII (PDP8), had ...

Viet Nam plans to develop large-scale energy storage systems as part of its strategy to stabilise its fast-growing renewable power grid and meet its net-zero emissions target by 2050, ...

Vietnam began implementing BESS systems from 2019. However, due to the lack of a complete set of policies and regulations for BESS development, most BESS systems in Vietnam are after-the-meter ...

Co-funded by a grant from U.S. Mission Vietnam, the pilot project will demonstrate how energy storage can help Vietnam integrate more renewable energy into its power system to meet ambitious climate ...

Vietnam sharpened its national energy-storage roadmap this week as government leaders, technical agencies, utilities, and industrial operators aligned on the next phase of Battery ...

The workshop aims to promote the harmonization of national standards with international practices, while also strengthening Viet Nam's capacity in the development, testing, and certification ...
